

AKHABUE ENOCH PROMISE

3D ARTIST & ANIMATOR

Edo State, Nigeria • enochpromise.va@gmail.com

[LinkedIn](#) • [Portfolio](#) • [YouTube](#)

SUMMARY

3D Artist & Animator specializing in stylized character creation and product visualization. Experienced in building assets across modeling, sculpting, retopology, UVs, texturing, rigging, lighting, and animation in Blender. Seeking a junior or entry-level role where I can contribute to production while continuing to grow within a professional studio environment.

Core Skills

- **3D ART:** Character Modeling, Hard Surface Modeling, Clean Quad Topology, UV Unwrapping, Texturing, Materials, Lighting, Rendering
- **Character & Animation:** Character Rigging, skinning, IK/FK, keyframe animation, Character Posing, Storytelling.
- **Software:** Blender

EXPERIENCE

Independent 3D Artist — Enoch Toon Studio *July 2026 - Present*

- Founded Enoch Toon Studio to build a growing body of original character and animation work and document the process publicly.
- Producing character assets end-to-end: modeling, sculpting, retopology, UV mapping, texturing, rigging, lighting, and rendering.
- Studying anatomy, topology, character design, and animation principles to strengthen technical and artistic fundamentals.
- Sharing project breakdowns and finished work on YouTube and LinkedIn to build a public portfolio and audience.

PORTFOLIO PROJECTS

Stylized Character — Character Modeling & Animation *Aug 2026 - Present*

- Modeled an original stylized character from base mesh to finished model, using clean quad topology built for deformation.
- Unwrapped UVs and developed materials to define the character's final look.
- Rigged the character with an IK/FK skeleton and skinned it for smooth, believable deformation.
- Posed and animated the character to explore expression and storytelling through movement.

Stylized Character — Character Modeling & Animation *Aug 2026 - Present*

- Modeled and textured three consumer products, a cream container, wireless earphones, and a drink can — with accurate proportions and realistic plastic, metal, and liquid materials.
- Ligh and rendered each product in a clean, commercial style suited for advertising and e-commerce use.
- Animated camera movement and product reveals to produce short, polished promotional clips for each item.
- Built a small product-animation series to show range across different materials and product categories.

EDUCATION

AMBROSE ALLI UNIVERSITY, Ekpoma — B.Sc. Banking and Finance *OCT 2010 - Oct 2014*
